- contributes to preparing and implementing the coordination and cooperation mechanisms and joint project activities with key stakeholders
- keeps up-to date with developments in the field of climate-smart land-use as well as climate policy (i.e. the UNFCCC climate negotiations) and makes relevant information/ knowledge available to partners in an appropriate format
- formulates job descriptions and terms of reference and selects and supervises third parties in the course of carrying out project activities, including performance evaluation
- supports aligning the services provided by the project with the partner's needs

2. Networking, cooperation, and communication

- supports cooperation, regular contact, and dialogue with partners in ASEAN and its Member States, implementation partners and other important stakeholders
- supports PR work to enhance visibility of ASEAN's engagement in climate policy and climate-smart land-use as well as the project and its results
- cooperates with local communities, relevant organisations, non-governmental agencies and individuals in the project environment and with other projects to improve and maintain good working relationships

3. Knowledge management

- draws up reports and presentation documents
- supports dissemination of knowledge products, information materials and other sources of knowledge
- assists with research activities and studies on political issues which benefit joint programmes

4. Management and coordination tasks

- contributes to project planning, develops project strategies and activities in close cooperation with the counterparts and further partners
- uses GIZ's Capacity Works to manage the tasks
- coordinates and prioritises relevant project activities in cooperation with the partners
- assists in monitoring of the project progress, the activities and the budget, drafts report and documents on the progress, identifies bottlenecks and recommends alternative management options to the principal advisor
- supports development of further project proposals
- compiles the relevant information for joint activities and assignments
- develops and organises quality assurance measures and suggests necessary changes, improvements, and initiatives

5. Other duties/additional tasks

- performs other duties and tasks at the request of management

C. Required qualifications, competences, and experience

Education

- advanced university degree (Master or equivalent) in a relevant discipline, ideally agriculture, environmental management/ science or related areas

Work experience and knowledge

- at least 5 years of experience in developing and implementing capacity development and dialogue formats in a regional or international context
- At least 5 years of experience in implementing approaches for and/or doing research on climate-smart agriculture
- At least 5 years of experience in managing projects and working with different stakeholders
- Proven experience with communicating complex topics in a targeted way to a broad range of stakeholders, including policy-makers
- proven experience with developing and implementing strategies for climate change mitigation and/ or adaptation and/ or climate finance is of high advantage
- experience with advising ASEAN bodies or member states is of high advantage

Further skills

- excellent command of both spoken and written English
- good knowledge of an ASEAN language and/ or German skills is of advantage
- excellent written and verbal communication skills
- knowledge of GIZ's management model Capacity Works is of advantage
- high sensitivity in dealing with political and administrative stakeholders, combined with the ability to assess various stakeholders, bundle their interests, and establish corresponding networks
- flexibility, reliability, efficiency, intercultural competence, personal resilience, and the ability to cope with stressful situations
